Introduction

Use this document to learn how to see a list of items scanned and/or imported in for a specific date.

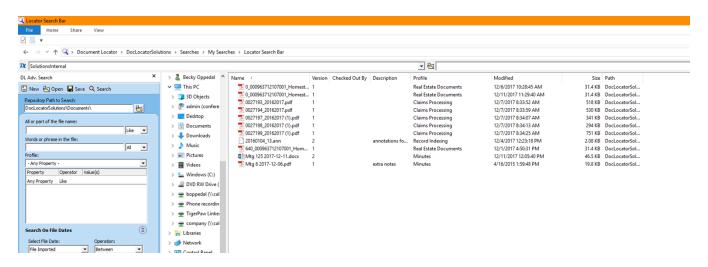

Process

Open Document Locator Click on Advance Search

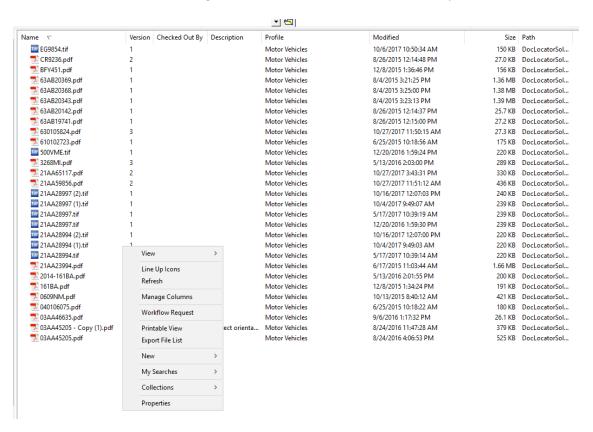

"Solutions" Image Services List of Items Scanned and/or Imported for a Specific Date

Results List

Once the results are returned, right click in the results to see additional options.

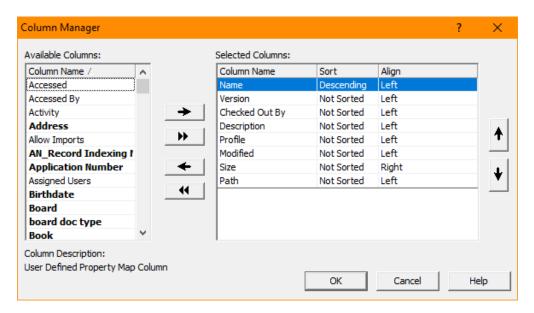

There are several options on this popup menu and this quick guide will address a few that are relative to getting a list of what has been scanned/imported.

List of Items Scanned and/or Imported for a Specific Date

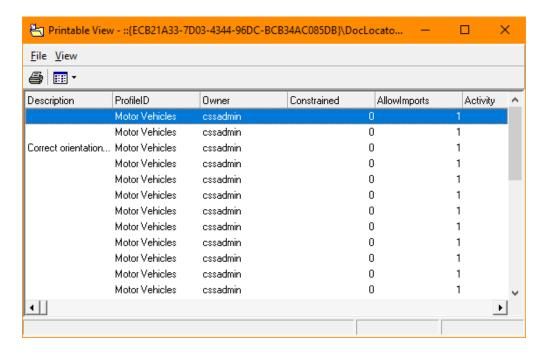

Column Manager

Use the Column Manager to pick and chose which columns to see in the results list.

Printable View

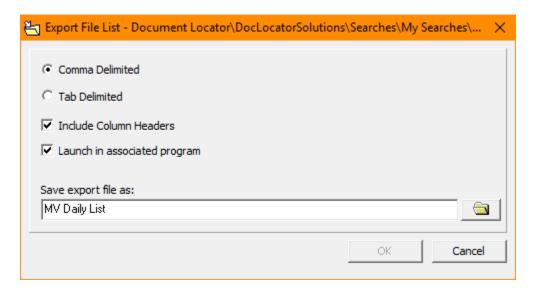

The printable view is an option to print the result list but is not recommended as you may get information than you desire.
